

Dear readers and authors of our Journal!

We are honoured to offer our sincere greetings on the New Year of 2021 and to wish you successes, both personal and professional.

We have entered the 20th year of publishing our Journal, realizing the immense contribution the papers presented in our Journal have had on the development of the economic science. The published articles are assigned names as per Digital Object Identifier System (DOI) and each author's Open Researcher and Contributor ID (ORCID) is included if available.

Throughout the 20 years of its operation, the Journal has published the research results of almost one thousand scientists from 26 countries, including Austria, Azerbaijan, Bangladesh, Belgium, Belarus, Bulgaria, Great Britain, Greece, Denmark, Kazakhstan, China, India, Italy, the Netherlands, Germany, Poland, Portugal, the Russian Federation, the USA, Slovakia, Slovenia, Turkey, France, the Czech Republic, and Japan. The Ukrainian scientists also frequently submit investigations that delve into the matters of integration into the European Union.

The Journal is indexed by several international scientometric databases such as Journal of Economic Literature – JEL (USA), COPERNICUS (Poland), ERIH PLUS (Norway), and Ukrainian Science (Ukraine). We are planning to expand our presence in the scientometric databases in 2021.
